Implementation Services

Data conversion is an involved, sometimes complicated procedure that must be completed with a high level of accuracy and precision. To make this process run smoothly, Caselle requires your assistance in providing the required materials for preliminary data conversion, offering clarification as needed during the conversion process, and supplying updated materials for the final data conversion. *Please read the following information carefully.*

Gathering Preliminary Data

Assemble the following information and send it to Caselle.

- Complete the **Information Worksheets** during each phase of the conversion.
- Provide **data to be converted**.
 - You may need to clarify the data, as needed, during the conversion process.
 - Caselle will not convert the prior period detail during data conversion unless optional history conversion is specified in the contract.
- Send **printed or PDF reports** to verify account balances at the time data is sent to Caselle for preliminary conversion and again for final data conversion.

Submitting Conversion Data

You will be provided a file layout for each application that will have data conversion. The file layout details the required and/or optional fields that Caselle will need to provide the conversion. The cost of conversion quoted in this proposal is based on your submission of the necessary data in the requested formats. If data cannot be supplied in this format, additional costs will be billed to get your existing data into the desired formats ready for conversion, and could delay any proposed timeline. We may also need file layouts or descriptions of tables and where all of the necessary information is located within your existing data to complete the conversion.

Data Conversion Timeline

The timeline begins when the requested data and all required preliminary information has been received by Caselle. The timeline to complete an accurate data conversion can range from 90 – 120 days. This is dependent upon the condition of the data and the client's willingness to review the preliminary information for accuracy, including information requested in the discovery phase of the conversion.

Scheduling Training

Important! Training will only be scheduled after Caselle has completed the mock conversion and the customer has reviewed and approved the conversion.

After training is scheduled, a representative from the Implementation team will review the remaining steps to ensure a successful implementation, prior to going Live on Caselle.

Software Setup & Data Conversion

This section contains the items, per directory, that will be setup and converted in each module. Since estimating the exact quantity may be difficult, we will adjust the calculated conversion cost if the actual number of items converted is greater than or less than 25% of the original estimate.

Data conversion requires that data be submitted in the required format. It is the responsibility of the customer to provide data to Caselle. Conversion services to retrieve or modify your data to the required formats are available at an additional cost. These services will be billed at Caselle's current hourly rate and are not included in this proposal.
